Got a few extra minutes? How about playing Boggle with your students. If you don’t know how to play this fun word game, you can find directions here. Because this is a Word document, you can use it again and again simply by putting new letters in the grid. In addition to the first page, which can be reproduced, I have also included a colorful second page that you can use on the document camera with students recording their results on notebook paper.

Tips:
• Although three minutes is standard for the real game, you may want to allow five minutes or more, especially for younger kids.

• Another option is not to time it at all, but rather use it as an extra activity (great for when kids who finish standardized tests early).

• Students can score their own papers (no need to do the cancelling out part if you are playing with a large group, just let everyone count all their words - it also makes for more challenging math when adding up the points)

• Students enjoy sharing their long words.

• When making your own grid, be sure to check it for inappropriate words (as a rule, I never put the letter "F" in my grids).
